

**AMENDMENTS TO THE SPECIFICATION:**

Please amend the specification as follows:

1. Please amend the abstract as follows:

A method, computer program product and computer system for dynamic data type enrichment. A predefined application program (210) uses (410) at least one basic data type (110). At runtime, when the application program (210) is executed, the computer system (900) adds (420) metadata (150) to the at least one basic data type (110).
